

A+ Science Newsletter

"Just don't give up trying to do what you really want to do. Where there is love and inspiration, I don't think you can go wrong."

Ella Fitzgerald

We are soon ready with the second quarter of 2023. Despite the competition amongst CROs in Sweden, we keep on receiving many inquiries by both existing and new customers. In the last 5 months we have won new assignments and things are moving as planned.

Both clinical operations and pharmacovigilance services are delivered in close collaboration with our customers. A+ Science is famous for that. We have frequent contacts with our customers which has led to customer satisfaction and that is our top business priority.

In this newsletter we would like to introduce Sofia Sundberg Örtégren who has joined A+ Science as Clinical Research Associate (CRA). Sofia holds a master's degree in molecular life sciences and has experience from the pharmaceutical industry and microbiology. Sofia has previously worked at a vaccine company in their microbiology team with quality control and prior to that at the Swedish Food Agency in their biology department. Sofia is a valuable asset to our team.

We asked Sofia how she feels about joining A+ Science, this is what she answered:

Sofia Sundberg Örtegren

“This is a new field for me and I’m very excited and grateful to be a part of the A+ Science team. One of the things I really appreciate at A+ Science is the flexibility of the company, which makes it possible for an employee to broaden own experience and contribute to a more inspiring and varying work. I am very confident that the great competence possessed by my colleagues and the workplace culture with a “feel like a family” at A+ Science will be of great aid in my exciting journey into the field of clinical operations.”

On behalf of A+ Science, we would like to wish all our readers a wonderful and relaxing summer. Enjoy family and friends!

Contact us at info@a-plusscience.com to find out more about how our team can help you reach your goals and objectives.

Are you aware of the services A+ Science provides?

- Our services include clinical trial management, we can conduct the entire clinical study, from start to finish or parts of it, depending on our customers' needs.
