"Appreciation is a wonderful thing: It makes what is excellent in others belong to us as well"

Voltaire

Despite the ups-and-downs, we hope that 2021 has been a good year for our readers.

To summarize the year at A+ Science, 2021 began with new beginnings, new clients, and new projects. Although several of us still worked remotely, we managed meeting live several times at our office in Stockholm. We joined some digital conferences but look forward to participating in live events in 2022. Two new colleagues joined our team and we now have the best team anyone could ever ask for, making our daily work real fun. Things are slowly but surely getting better.

We would like to extend our sincere thanks to our customers, partners and employees for the ongoing support and loyal dedication throughout 2021.

During this holiday season, A+ Science has chosen to make a charitable donation to UNICEF to help children in emergencies. We hope our donation will help save lives and protect children.

From the entire team at A+ Science, we wish everyone a Merry Christmas and a prosperous, joyful and peaceful New Year!

We have given a donation to help children in emergencies.

UNICEF is on the ground in emergencies and provide the affected children and their families with water, food, shelter, vaccines and healthcare. And they protect children from violence, abuse and exploitation. UNICEF is helping to prevent the spread of covid-19 and protect affected children and families.

Thanks to this donation more children's lives can be saved.

Contact us at info@a-plusscience.com to find out more about how our team can help you reach your goals and objectives.

Are you aware of the services A+ Science provides?

- Our services include clinical trial management, we can conduct the entire clinical study, from start to finish or parts of it, depending on our customers' needs.
