

A+ Science Newsletter

"To successfully work with other people, you have to trust each other. A big part of this is trusting people to get their work done wherever they are, without supervision".

Sir Richard Branson

"The pandemic is not over, but is entering a completely new phase," said Sweden's Prime Minister Magdalena Andersson. "We are nearing the point for Sweden to open up again." This is what happened, almost all restrictions were removed on February 9th. We all look forward to gradually going back to our normal routines.

We asked our Chairman of the Board, Mikael Nordenstjerna who has been involved in A+ Science board assignments since 2020 to sum up the last two years.

"I joined A+ Science as Chairman of the Board in the Spring of 2020 and one of the first things we had to handle was Covid-19. Safety of the employees, general uncertainty in the market and how to handle delivery of our services were the main things on the agenda. Looking back, I think we handled the pandemic well and were able to build a solid foundation for not only survival, but for growth as well. Today we are looking forward and the future is bright for

A+ Science. It's been a joy to work with the dedicated, smart and ambitious people in the company, and I'm looking forward to keep doing that in the years to come." Says Mikael Nordenstjerna

Mikael Nordenstjerna, Chairman of the Board

Contact us at info@a-plusscience.com to find out more about how our team can help you reach your goals and objectives.
