

A+ Science Newsletter

"To lose patience is to lose the battle."

Mahatma Gandhi

We can all agree that 2020 was a year like no other. No one has escaped the pandemic scot-free. There's no hiding, it was a tough year for everyone – we are all affected by it in one way or another.

In the face of this pandemic, we have implemented procedures to safeguard our employees while continuing to best serve our clients. We will continue ensuring business continuity while protecting our people.

While the way we work changed in 2020, our commitments to quality delivery did not. Fortunately, despite hard times, meetings have been efficiently handled electronically and we have all become digital experts. No doubt, few new outsourced clinical projects are put on hold, this makes us look even more forward to welcoming an exciting 2021, new clinical trials which will make a difference in the lives of many patients.

We would like to extend our sincere thanks to our customers, partners and employees for the ongoing support and loyal dedication during this challenging time. We are all in this together and with patience we will get through it together.

During this holiday season, A+ Science has chosen to make a charitable donation to UNICEF to help children affected by the corona virus pandemic. We hope our donation will help save lives and protect children.

With this last newsletter of 2020 we would like to wish all our readers a new healthy, prosperous and peaceful year. We also hope that 2021 will be a promising year with breakthroughs in the world of clinical research.

Do not hesitate to contact us at <u>info@a-plusscience.com</u> to find out about how A+ Science can help you conduct your clinical trial. We offer custom-made and flexible solutions which increase efficiency and reduce costs associated with bringing new pharmaceuticals to market. We also offer full range pharmacovigilance services for Investigational Medicinal Products (IMPs) and medical devices during clinical trials and Authorised Medicinal Product after marketing authorisation.
