

A+ Science Newsletter

"Every job is a self-portrait of the person who does it. Autograph your work with excellence".

Author unknown

It has already been 7 months since Eva Fredriksson, Head of Clinical Operations, started her employment at A+ Science. We have all been curious and have asked Eva about how has it been working for A+ Science?

"After having worked for large pharmaceutical company as well as for "Region Stockholm", it has been so much fun, enlightening, and informative to start working for a smaller Swedish company. Even though most of us work from home during this pandemic, I have noticed the closeness of the colleagues and the positive team spirit here at A+ Science. We have a flat organization, having short decision paths and a common understanding of our company objectives are key drivers for progress.

Eva Fredriksson

Just like other companies and during this pandemic, we have had a period where some of our projects were put on hold. However, since April things seem to be moving towards the right direction and we have been able to perform most of our clinical activities. Moreover, we have received many inquiries and several new projects will also start in Q3 2021, so we have a very busy autumn and winter ahead of us. I look forward to enjoying more coming years together with my colleagues at A+ Science." says Eva Fredriksson.

Are you aware about the services A+ Science provides?

- Our services include clinical trial management, we can conduct the entire clinical study, from start to finish or parts of it, depending on our customers' needs.
- We also provide full pharmacovigilance services, pre-and post-marketing, including 24/7 availability of QPPV, Deputy QPPV and Drug Safety Physician, safety database license including MedDRA license, ICSR processing (pre-and post-marketing) including medical review and submission to Eudravigilance and MHRA, Regulatory intelligence, literature search and review (global and local), ICSR collection from EVWEB, monitoring of MHRA ICSR portal, XEVMPD and PSMF maintenance, signal management, writing of SOPs, PSURs, DSURs and RMPs.
- We can empower your team by outsourcing personnel (short- and long-term solutions).

- Since 2004, we offer services within Continuing Medical Education (CME) in collaboration with University Hospital of Umeå and the Sahlgrenska Academy, University of Gothenburg.
