

A+ Science Newsletter, January 2019

"A person who never made a mistake never tried anything new."

Albert Einstein

It is the first month of the new year and this is when most of us focus on planning our new accomplishments for 2019. Vision is the ability to plan based on everything we have learnt in the past. Vision is not only the ability to see, it's also our strategy for doing something about what we see and what to expect in the new future because of those actions. We can learn from everything, even from our mistakes, because even mistakes carry insights if we pay attention to.

If you have the foresight to benefit from the team around you, that will help you succeed. Choosing the right partners and collaborators will help you reach your goals and achievements.

In this newsletter we would like to take the opportunity and introduce our colleague and Head of Finance, Sebastian Guevara. Sebastian has Master's Degree in Business Administration.

"When I took over this assignment I was very sure that it was going to be an exciting task. I have had the pleasure of getting to know A+ Science in depth and have understood the complexity and challenges of the life science industry. I look forward to working at A+ Science, it is an exciting and experienced company founded over 2 decades ago," says Sebastian.

Sebastian Guevara

Another exciting news in January is that A+ Science is recruiting and seeks positions within its clinical operations and pharmacovigilance departments. Read more about those positions on our website [here](#)
