

A+ Science Newsletter, March 2019

"You must create a culture, where people are one hundred percent committed to the common goal."

Sir Richard Branson

In this newsletter we would like to remind you of A+ Science proprietary, POINT, a web-based computer system the aim of which is to support and cover the main parts of a clinical trial. The system supports modern web browsers.

Point 

Gathering all aspects of a clinical trial in one place is an ideal solution, one system, enabling a clearer picture of the progress of your trial. Point study system provides one entry point to all data and offers a possibility to predict the number of randomized patients in order to meet the requirements stated in the study protocol.

Main features of POINT consist of:

Call center application

The call center application is a customised feature built for each study. There are built-in functions that enable creation of patients and possibility to add questionnaires with exclusion rules.

Scheduling

This is a set of functions that is used for the planning of the personnel at the investigational site and book all patients' visits. This booking system forces the

user of the Point system to follow the study protocol and assure that there is staff available at the clinic.

eCRF

The Point system has built-in functions for creation of CRFs. The CRFs are connected to the visits. When defining CRFs in the Point system, it is possible to add rules that excludes a patient depending on what is answered in the CRF form.

Lab data import

The point study system has a built-in lab data import function. A lab data file is exported from the lab and mapped into lab data tables in Point.

Statistics

A statistics tool is used to get statistics from each investigational site and the clinical trial in total. The statistics tool can be used to predict the number of randomized subjects.

Patient homepage

The patient homepage gathers all information of each patient, i.e. status, informed consent, entered CRF data as well as lab data.

Do not hesitate to contact us at info@aplusscience.com and hear more about how we can help you conduct your clinical trial.

A+ Science will be attending several events. If you will be participating and wish to meet us there, please send an email to info@aplusscience.com

AstraZeneca Exchange 2019, 14 May 2019, Gothenburg
NLSDays 2019, 10-12 September, Malmö-Copenhagen
Park Annual 2019, 26 September, Sahlgrenska Science Park, Gothenburg
BIO-Europe 2019, 11-13 November, Hamburg
SwedenBio Summit, 4 December, Stockholm
