

A+ Science Newsletter

“When a flower doesn’t bloom, you fix the environment in which it grows, not the flower”.

Alexander Den Heijer

It has now been a year since the start of the COVID-19 pandemic, which has claimed millions of lives and changed the ways in which each of us relates to and navigates the world.

Because of the pandemic, millions of people worldwide started working from home. According to a European Commission brief, approximately 40% of all people employed in the European Union began to work from home as a result of the pandemic.

Despite the distances between us, our team at A+ Science has worked with one another closer than ever; the pandemic has taught us many positive things. Relying on one another, supporting each other, and staying updated about the daily activities of our operations.

We shall not forget that a positive work environment, improves our happiness, and motivates those around us. Ultimately, a positive mindset can help the team focus on the pros rather than the cons of a situation. With this in mind, we have had compassionate team members with positive reinforcement and good work-life balance.

We are very happy that despite the challenges that Covid 19 has brought along with it, we have achieved many positive things within our team at A+ Science.

Stay tuned to our next newsletter which will be mainly about the Clinical Trials Information System!

Are you aware of all the services A+ Science provides?

- Our services include clinical trial management, we can conduct the entire clinical study, from start to finish or parts of it, depending on our customers' needs.
- We also provide full pharmacovigilance services, pre-and post-marketing, including 24/7 availability of QPPV, Deputy QPPV and Drug Safety Physician, safety database license including MedDRA license, ICSR processing (pre-and post-marketing) including medical review and submission to Eudravigilance and MHRA, Regulatory intelligence, literature

search and review (global and local), ICSR collection from EVWEB, monitoring of MHRA ICSR portal, XEVMPD and PSMF maintenance, signal management, writing of SOPs, PSURs, DSURs and RMPs.
