

A+ Science Newsletter, January 2017

*"An optimist stays up until midnight to see the New Year in. A pessimist stays up to make sure the old year leaves."*

Bill Vaughan

---

Another year has gone by, let us look back at some of our highlights; During 2016 we empowered our team with additional qualified colleagues. Our site management organisation, A+ Science City Site was upgraded. We expanded our team and recruited qualified resources to strengthen the operations at our site. We updated our POINT study system, a web-based computer system the aim of which is to support and cover the main parts of a clinical trial.

We established collaborations with new and former clients and are proud to be involved in new clinical trials. We are thankful for our loyal clients who are satisfied with our services and trust us.

2017 is here now! We will celebrate an important milestone this year, A+ Science will turn 20 years old. Our company was one of the first CROs in Sweden. The company operates today in Stockholm and is run by its employees.

A+ Science is a CRO which offers personalised services, we are an extension of our clients' team. If you wish to have the undivided attention of your CRO partner, you should then contact us.

This is our and your fresh start. It's a time to make resolutions, visualize goals and move forward toward success, growth and change. Commit to make 2017 a good year.

*Anders Hellgren discussing Phase I trials during our GCP evening in January 2017*

*Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference.*
