

A+ Science Newsletter, June 2017

"Sometimes the smallest step in the right direction ends up being the biggest step of your life. Tip toe if you must, but take the step."

Naeem Callaway

We are very delighted to welcome two dynamic personalities who have joined our company's Board of Directors, Agneta Edberg as Chairman of the Board and Meg Tivéus as Board Member.

Agneta Edberg has a degree in Health Economics from Stockholm School of Economics as well as Biomedical Education.

" It is truly an honor to support and work alongside a group of hard working, intelligent and quality-minded women. In my past I have from different angles experienced the importance and gains from well-prepared and well-performed clinical studies: As a Sales Representative showing my customers solid proof of efficacy and safety, as a Marketing Director introducing better and more easy to use products onto the Nordic markets, as a CEO trusting the Contract Research Organization to deliver cost effective and fast recruitment as well as GCP compliant data and lastly as Chairman of the Board of many biotech and medtech companies increase greater patient and shareholder value. Therefore, it was very easy for me to accept the nomination to become the Chairman of the Board of A+ Science, a company striving to achieve all the important things needed to change the life of patients with speed, quality and high standards. I love the combination of business development and clinical development!

In my past I have worked at and with many life science companies different positions, among others: J&J, Orion, Pharmacia, Pfizer, Bactiguard, BioResonator, Likvor, Recopharma, Idogen, Probac, Immunicum, TSS and all these companies have been dependent on valid and solid performance data to get fast access to the market. I am looking forward to be working with A+ Science and Meg Tivéus, who is an intelligent and very experienced Board Member with a lot of humor. This is going to be fun!" says Agneta Edberg.

Agneta Edberg

Meg Tivéus has studied Economics at Stockholm School of Economics as well as Medicine at Karolinska Institute for a couple of years.

Meg has a long background in different operational jobs like Managing Director in companies like Holmen, Åhlens, The Swedish Post and The National Lottery. She has also worked more than 15 years as a professional Board Member in many

different companies. She has always been deeply interested in medicine and healthcare companies.

" The reason I joined the A+ Science Board of Directors was actually due to curiosity. I have been involved in the Boards of several companies in a wide range of industries, like Danderyds Sjukhus AB, Folktandvården i Stockholm AB, Frösunda AB, Apoteket Farmaci AB, but have never been involved in clinical research. I sincerely believe I can contribute in developing A+ Science into a healthy and profitable company," says Meg Tivéus.

Meg Tivéus

The Board of Directors at A+ Science consist of Agneta Edberg, Chairman of the Board, Johanna Andlin, Anna Fröling, Jennifer Heyno and Meg Tivéus.

On behalf of everyone at A+ Science, we would like to wish all our readers a wonderful and relaxing summer.

Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference.
