

A+ Science Newsletter, March 2017

*"The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have little."*

*Franklin D. Roosevelt*

---

Winter is gone and Spring is here with its energy boost. For many of us the extended daylight boosts mood, wellbeing and energy. We have been looking forward to this.

One of our core business areas at A+ Science is the outsourcing of our consultants. We provide services and skilled consultants within all professional categories of our business areas. From junior to senior levels and of course in accordance to our clients' needs.

We are committed to diversity and believe in equality for everyone in our company. Self-development and professional growth is very important for us. All our colleagues, whether outsourced or in-house are part of our organisation that values well-being.

We asked our colleague Neda Rahpeymai about how she feels to be employed at A+ Science while outsourced in another company. Neda has

bioinformatic background and has been employed at A+ Science since 2007. She is currently outsourced and works within pharmacovigilance.

Here is Neda's answer: *"It all started in 2011 when I became curious and interested in pharmacovigilance and the idea of being outsourced in a client's office. Since then I have been working with challenging and exciting projects. To be employed at A+ Science and at the same time outsourced in a client's office feels like getting the best of two worlds. It is a challenging, instructive and learning experience. Most of all I get to know and meet new people in both companies. I am still part of A+ Science and stay updated with my colleagues as well as the developments of our company. We have monthly GCP or office meetings followed by very pleasant after work evenings."*

Neda Rahpeymai

*Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference.*
