"Nothing is particularly hard if you divide it into small jobs." Henry Ford

A+ Science, a CRO run by its employees

Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference

A+ Science is proud to announce that Eva Järleberg and Monika Cardell have joined the company.

Eva joins the company as Research Nurse at A+ Science City Site.

"After several years in the Pharmaceutical Industry and working as Clinical Research Associate (CRA) at a Global Study Management Department, I felt that time has come for me to return to patients. When I was young and started as Registered Nurse I felt that the contact with patients was so interesting and gave me a lot of positive energy. I had missed that dimension in my work, however the interesting years with clinical research has given me a lot. Now, while joining A+ Science I return to my initial passion, which is to bring good care and also contribute to research that gives us new treatments. I am happy to join this company and feel very glad every day I go to work." Says Eva Järleberg.

Eva Järleberg

Monica joins the company as Drug Safety Assistant.

"I am a nurse specialised in intensive care with many years of experience in medical and cardiac intensive care. I also have experience within other areas, such as general medicine, respiratory medicine, psychiatry and geriatrics.

After many rewarding working years within the healthcare sector, I shifted to the pharmaceutical industry in 2001. My first assignment was to work as a Research Nurse in a phase 1 unit of a pharmaceutical company. Since 2002 I was employed in a big CRO company. I have always had long term outsourcing assignments. I have ten years of experience as Clinical Trial Assistant (CTA) in clinical trials conducted in the Nordic and Baltic Countries and in Russia. Since 3 years I am working as a Drug Safety Assistant in a big pharmaceutical company and very happy in my current role. I am very happy and grateful for everything I learnt in the healthcare sector, it has been very useful in my current role. The advantage of working for a small CRO is that you are seen, heard and supported as an individual, this leads to a better work performance in my outsourced assignment and CRO mission." Says Monika Cardell.

Monika Cardell
