### **A+ Science, a CRO run by its personnel**

*Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference.*

In this newsletter we are very delighted to introduce you to our newly upgraded Site Management Organisation, A+ Science City Site.

At City Site we conduct phase II-IV clinical trials as well as medical device investigations within several therapeutic areas.

In order to facilitate patient recruitment, we collaborate with specialists within different therapeutic areas as well as with general practitioners in primary care centers. We have access to a physician who is always available at site. We provide study specific research nurse(s) to support our vendors with their trials. We can also provide short-term or long-term staffing solutions by outsourcing our nurses. Our flexible opening hours are highly appreciated by our study subjects. Last but not least we do our utmost to keep a pleasant working environment.

*"We have expanded our team and recruited several research and assistant nurses to strengthen the operations at our site in order to be able to conduct more trials and increase the number of recruited patients in our clinical trials. We have also now larger space at our facility and access to additional rooms. We are creating a more stable foundation with a fantastic and motivated team in a unique*

*facility located in the heart of Stockholm at Hötorget. Recently we had an internal audit with impressive results, thanks to this amazing team", says Suzanne Gunvarsdotter, Director of City Site.*

City Site has been involved in many trials and within several different therapeutic areas, e.g. diabetes, cardiovascular, vaccine, pain, asthma, gout, osteoarthritis, chronic obstructive pulmonary disease (COPD) and many others.

If you are planning to conduct a clinical trial in the near future and wish to hear more about our Site Management Organization, City Site, send an email to [info@a-plusscience.com](mailto:info@a-plusscience.com) or call +46 (0)70 624 0900.

Our team at City Site: Maria Axelsson, Thomas Bergström, Birgitta Rangman, Thérèse Larsdotter Damm, Åke Olsson, Suzanne Gunvarsdotter and Kerstin Pålsson

A+ Science will be attending the below events. If you will be participating and wish to meet us there, please send an email to [info@a-plusscience.com](mailto:info@a-plusscience.com)

SwedenBIO Summit, 7 December, Stockholm

Pharma Outsourcing, 8 December, Stockholm Waterfront
