

## A+ Science Newsletter, September 2016

*"Technological progress is like an ax in the hands of a pathological criminal"*

Albert Einstein

---

### **A+ Science, a CRO run by its personnel**

*Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference.*

In this newsletter we would like to introduce you to A+ Science proprietary, POINT study system, a web-based computer system the aim of which is to support and cover the main parts of a clinical trial.

Using different systems in clinical trials is frustrating for all involved parties. Gathering all aspects of a clinical trial in one place is an ideal solution, one system, enabling a clearer picture of the progress of your trial. Point study system provides one entry point to all data and offers a possibility to predict the number of randomized patients in order to meet the requirements stated in the study protocol.

Here are the main features of our centralized system:

- Call center application
- Scheduling
- eCRF
- Lab data import
- Statistical tool
- Patient homepage

You can read more about POINT [here](#)

For the 4<sup>th</sup> consecutive year, A+ Science participated in NLSDays. During the 2 congress days, we met inspiring people and interesting companies. There were 1070 delegates, 680 companies from 36 countries. 2200 organised face-to-face meetings took place.

From left to right, Anna Fröling CEO and CFO, Jennifer Heyno and Tania Persson

A+ Science will be attending the upcoming below events.

If you will be participating and wish to meet us there,  
please send an email to [info@a-plusscience.com](mailto:info@a-plusscience.com)

Park Annual 2016, 29 September, Sahlgrenska Science Park, Göteborg

SwedenBIO Summit 2016, 7 December, Stockholm

Pharma Outsourcing, 8 December, Stockholm Waterfront
