### **A+ Science, a CRO run by its employees**

*Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference.*

We are very happy to announce that since mid-March Jennifer Heyno is one of our in-house colleagues. Jennifer has several years of experience within clinical trials. Besides being a member of the board and the management team, she is now the Director of Outsourcing at A+ Science.

Since Jennifer has had the experience of being outsourced, she is an excellent person to provide support and act as mentor to our outsourced colleagues. She will also act as contact person to several of our current and potential outsourcing customers. Jennifer will also participate in several of the Life Science events together with the A+ Science marketing team. We welcome Jennifer to our in-house team!

Jennifer Heyno

A key requirement for anyone involved in the conduct of clinical research is Good Clinical Practice (GCP) training. GCP is the ethical and practical standard to which all clinical research is conducted. The principles of GCP state that: Each individual involved in conducting a trial should be qualified by education, training and experience to perform his or her respective task(s).

At A+ Science we make sure that everyone follows those principles. We have regular GCP training evenings led by our QA consultant, a recap of the essentials and a look at what's new. Those evenings are very much appreciated by our staff as well as our customers.

A+ Science will be attending several events. The below events are now booked. If you will be participating and wish to meet us there, please send an email to [info@a-plusscience.com](mailto:info@a-plusscience.com)

The Future of Swedish & Danish Life Science, 31 March, Medicon Village, Lund

Bio-Europe Spring 2016, 4-6 April, Kistamässan Convention Center
