

A+ Science Newsletter, May 2015

"The dictionary is the only place where success comes before work."

Mark Twain

A+ Science, a CRO run by its employees

Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference

We are proud to inform our readers about our positive result for year 2014. As we mentioned last year in the first issue of our newsletter *"Coming together is a beginning. Keeping together is progress. Working together is success."* We now have seen the results of our hard work.

A message from our company CEO Anna Fröling:

"It is an honor and a tremendous privilege for me to be part of an organisation with motivated, talented and experienced colleagues. I have been in the company as CFO since 2012, last summer I became the company's CEO. 2014 has been a fantastic year in the company's history. We have positive results with a profit margin of 11%. This is especially gratifying since the company has been struggling for a long time with cost savings and negative results.

It has paid off to be a CRO run by its committed and dedicated employees. We have many inquiries from new as well as previous customers. This proves that we have become an attractive partner in the market, very encouraging and positive for our future. We will continue to develop our business and ensure trust and value for our customers by finding flexible solutions and delivering qualified services."

Anna Fröling, CEO

Few lines from the Management Team:

"As business developer, my main goal is to establish a relationship with customers based on their needs and not mine", says Tania Persson.

"As Director of Pharmacovigilance Services, my primary focus is to support our customers in their daily pharmacovigilance activities and in legislation updates", says Eva Stenqvist.

"At A+ Science City Site the patients are in focus which results in the well-being of our patients and satisfies the sponsors. Satisfied patients and high security level increases the total number of assignments", says Suzanne Gunvarsdotter.

"Being part of the Outsourcing Team of A+ Science, I am proud to work with qualified and competent colleagues. We have long term relationship with several of our customers, this is a proof that they are satisfied with our services and the consultants we deliver to empower their clinical team", says Jennifer Heyno.
