"Vision without execution is hallucination"

Thomas Edison

A+ Science, a CRO run by its employees

Our vision is to become the CRO best known for its unique and dedicated personnel with focus on customer satisfaction. To Earn Trust- Make Difference

In this newsletter we would like to introduce you to our City Site, a Site Management Organisation (SMO) located at Hötorget, in the heart of Stockholm.

City Site started its operations in year 2008 and since then phase II-IV clinical trials and Medical Device Investigations are conducted within several therapeutic areas. We collaborate with specialists as well as with general practitioners in primary care centers. Our main goal is to have an efficient patient recruitment to meet the objectives of the trial.

City Site has been involved in many trials and within several different therapeutic areas, e.g. diabetes, cardiovascular, vaccine, pain, asthma, gout, osteoarthritis, chronic obstructive pulmonary disease (COPD) and many others. Our nurses are experienced research nurses with a solid understanding of Good Clinical Practice (GCP) and Swedish regulations such as the Biobank and Data Privacy Acts.

At City Site we use the electronic case record system ErgoMed which fulfills all the requirements set out by the authorities for a case record system, (personal login, audit trail and back-up). Our processes are regulated by the steering document, Standard Operating Procedures (SOP). Regular quality audits are performed by the QA Officer of A+ Science.
